Hi Jason,

You have earned a full Nanodegree scholarship to Phase 2 of the Bertelsmann Data Science Scholarship!

Out of 15,000 students in the Bertelsmann Data Science Challenge Course, your progress and dedication in the community really stood out. We've been impressed and are excited for you to continue the journey and grow even stronger as a data scientist!

In the full Nanodegree program, you'll build off your earlier coursework, submit projects for official review and feedback, and earn a Udacity Nanodegree credential upon successful completion of all of your projects.

ACTION REQUIRED: Complete the Pre-Assessment by September 2

Scholarship recipients will be enrolled in one of three Nanodegrees for Phase Two; Data Foundations, Data Analyst, or Business Analyst. To determine which track is appropriate for you, we are asking all Phase 2 recipients to **complete this pre-assessment by 11:59pm UTC on September 2.**

The assessment should be completed in one sitting, includes 50 questions, and should take you no longer than 75 minutes.

The test requires you to login with the email address and password you have used for the challenge course. We recommend that you take the test somewhere quiet, and prepare yourself adequately to complete the test the first time, because it can only be completed once.

Please inform us as soon as possible if you are unable to complete the pre-assessment by September 2.

TAKE THE PRE-ASSESSMENT NOW

As a scholarship student, you will be automatically enrolled into the program on September 7 and will be able to access your Nanodegree program directly in your classroom. We've also created a brand new Slack workspace for Nanodegree scholarship recipients so that your classmates and you can continue learning together. Use this invite link to join now!

Per the terms of the scholarship, you have committed to participating regularly in the program. **If you have not logged in and begun learning by September 14, you will lose access to your scholarship.**

We will be following up with more details on the Nanodegree program itself before class starts on Friday, September 7 to let you know once you've been formally enrolled.

We can't wait for you to start and to see what you'll create this time around!

Warm regards,

Dan & Kathleen
